AUTOMATIC PUMMEL TESTER
WITH PLC CONTROL

The Softeco pummel-tester is made to comply with EN 14449 - Laminated glass and laminated safety glass - Evaluation of conformity/Product standard.

The test results are independent of the operator, guaranteeing comparable results.

CHARACTERISTICS

• Pneumatic hammer, adjustable speed and force is controlled by PLC
• Manual or automatic positioning of the laminated glass sample, controllable by PLC
• Safety cover
• Glass sample thickness: 6-24mm
• Glass sample size: 300x300mm
• Angle between glass and support 5°

OPTIONS

• Manual pummel tester for thin glass (3+3mm and 4+4mm)

• Noise control casing (without noise control casing, the noise is between 107 and 77 dBA).
