APPLICATION

TW-25 Dew Point Tester for measuring the dew point of insulating glass units:

- meets the requirement of ASTM E546 or E576 standard
- portable
- suitable for sealed insulating glass units positioned horizontally or vertically.
- can be used to select samples for humidity penetration test

SPECIFICATIONS

- Diameter of the exposed flat circular surface in upper block: Φ25.4mm;
- Volume of dry ice container: Φ75x145mm;
- Temperature ranges: from –10 °C to –60 °C;
- Accuracy of digital thermocouple: 1 °C;
- Thickness of glass: ≤6 mm.
