

GLASS POWDERING MACHINE WPM 2500

Powdering machine WPM 2500 gives an even layer of powder on glass. It beneficially improves optical quality in difficult, highly bent glass.

The WPM 2500 is installed after glass washing machine, consisting of a mixer with control panel and a spraying cabin. It is programmable: every glass or e.g. every second glass is powdered.

TECHNICAL DETAILS

- ◆ max. capacity 1pc / 15sec
- ◆ max.glass width 2500mm
- ◆ water / diatomate mixer 30l
- ◆ total installed power 11kW, 380 V,50 Hz,3phase, N+E
- ◆ compressed air 6bar, 30l/min

GLASS POWDERING MACHINE WPM 2500

DETAIL INFORMATION

① Mixer with control panel

- ◆ *size 1100mm x 1400mm x 800mm*
- ◆ *30 l water / diatomate container with mixing equipment*
- ◆ *compressed air control panel*
- ◆ *spray pump, valves and control panel*
- ◆ *installation on factory floor*

② Spraying cabin

- ◆ *size 2800mm x 1750mm x 850mm ; other sizes available*
- ◆ *2-3 pcs spraying nozzles*
- ◆ *automatic optical control to start and stop spraying*
- ◆ *installation on the washing machine unloading conveyor*
